

THOMPSON DUKE INDUSTRIAL

MPM MOUTHPIECE FASTENING MACHINE

The American-made MPM Mouthpiece Fastening Machine is a semi-automatic, foot pedal operated machine designed to rapidly fasten screw style mouthpieces for vaporizer cartridges. The MPM is easy to use with a torque adjustment and clutch to prevent strain to the operator. Increase throughput by fastening duckbill, circular, bullet, or hourglass screw style cartridge mouthpieces.

Increase Overall Process Throughput

Accelerate the entire operating procedure. Significantly increase the mouthpiece fastening rate to match the cartridge filling machine throughput while reducing physical fatigue.

Fasten Any Mouthpiece Form Factor

Change the mouthpiece adapter in less than a minute to switch between duckbill style mouthpieces and circular, bullet, or hourglass style. Two adapters included.

Adjustable Torque

Quickly adjust the torque setting for the proper mouthpiece fastening force. Clutch automatically engages at the torque setting and adapter stops spinning. Proper fastening torque diminishes the potential for oil settling and cartridge leaks.

Variable Speed and Bidirectional

Adjust the front control knob to vary the rotation speed and reduce physical fatigue. Change the adapter spin direction from forward to reverse to remove the mouthpiece from the cartridge.

Quick & Easy Startup

Plug the MPM into a 120Vac outlet, connect the foot pedal, and immediately begin fastening cartridge mouthpieces. Adjust the MPM height for ergonomic comfort.

Certified

cETLus Certified for the USA and Canada (UL 61010-1, UL 61010-2, UL508, CSA C22.2, IEC 61010-1).

American-Made

Designed and manufactured in the United States of America using the highest quality materials and industrial control components. Exceptional customer support available for the lifetime of the machine.

Portable

Lightweight and portable benchtop design for quick and easy setup and operation. Foot pedal operated. Requires 120V AC power.

THOMPSON DUKE INDUSTRIAL

MPM MOUTHPIECE FASTENING MACHINE

The American-made, cETLus Certified MPM Mouthpiece Fastening Machine is a semi-automatic, foot pedal operated machine designed to rapidly fasten screw style mouthpieces for vaporizer cartridges. The MPM is easy to use with a torque adjustment and clutch to prevent strain to the operator. Increase throughput by fastening duckbill, circular, bullet, or hourglass screw style cartridge mouthpieces.

- ① Two included adapters support all screw top mouthpieces including round, bullet, duckbill and hourglass
- ② Quickly adjust the speed, torque, direction and height to accommodate any cartridge mouthpiece form factor.
- ③ Simple operation increases throughout put and reduces repetitive stress injuries to operators
- ④ Portable benchtop design takes minutes to set up and begin operation
- ⑤ Aluminum construction and stainless steel enclosure

Height	16" MAX
Width	11"
Depth	12"
Weight	16 LBS
Ambient Temperature	0-45 C (32-113 F)
Working Voltage	120VAC 60Hz Single Phase 3
Cap Rate	800/hr
Max Cartridge Height	8.0"

*Cartridge cap times vary by operator
